HOME MANAGEMENT

SAFETY – Security

- M1+** Security and sensing systems that can detect entry and exit events and determine glass breaks and motion can be integrated into your system. Is this something that appeals to you?
- M1+** Is your child breaking curfew? Would you like to see a log of when someone entered or exited your home?
- M1+** Would you like to be able to arm/disarm the security system remotely and receive alerts on your cell phone? This is helpful for a nanny, contractor and other service providers.
- M1+** Would you like the ability to see your home's security cameras remotely (on your phone, from the office, etc.)?
- M3** Would you like to record security camera video clips? This is perfect for seeing when FedEx® came by, or when the landscapers arrived this morning.
- M1+** Would you like to be able to see who's at the front door from the comfort of your bedroom?

CONVENIENCE – Lighting

- M1+** A well-executed lighting design adds beauty and elegance to your home. Would you like to remove the 6 or 8 unsightly switches from your wall and with a single button press, easily adjust all the lights in the room?
- M1+** Would you like the ability to set custom lighting scenes and control them from anywhere in the house?
- M1+** When you go to bed, would you like to be able to press a single button to turn out all the lights and close the drapes in your home?

COMFORT – Climate

- M1+** Many larger homes have independent zones for heating and cooling. How do you intend to manage all the thermostats in your home? Would you prefer to use a single touch to set them all to reflect a comfort setting or energy efficient setting?
- M1+** Is automatic notification of an unexpected temperature change with your home's heating or cooling important to you?
- M1+** Does being able to easily set your own heating and cooling schedules, and therefore conserving energy, appeal to you?

CONSERVATION– Pool / Spa / Irrigation

- M2+** In addition to conserving energy, our systems will help you monitor and therefore conserve water usage as well. Would you like to be able to easily and remotely set the irrigation times. This can be valuable if you have landscapers and need to turn off the sprinklers if they arrive while you're at the office.
- M2+** Hot tubs consume massive amounts of energy. Would you like to be able to heat it up as you leave the office so it's ready when you

ENTERTAINMENT

Music Around the House

In which rooms would you like to have independent listening?

- Master Bedroom Master Bath Family Room Patio
- Kitchen Rec Room Dining Room Garage

Other: _____

Music in Every Room

- E1+** Would you like access your iPod's music from anywhere in the home, with the ability to change the song with a simple touch?

Music Collection

- E2+** Would you like to know about what's currently playing, what song is next, view cover art – even select a favorite playlist – from any room in the home.

Music Online

- E3** Would you like to be able to share new media forms like internet radio, Rhapsody and Pandora around the home?

EXPAND THE POSSIBILITIES

Movie Collection

- Are you a movie buff with a large DVD collection? Would you like to catalog that collection and have instant access to favorites using a brilliant on screen menu?

Door Chimes & More

- Door chimes that can be heard around the house are a great convenience, especially in larger homes. Would having door chimes play through the speakers in every room appeal to you?
- What if you could pick up any phone and page the kids to come to the kitchen for dinner – or even announce a phone call?

Always Alert

- A truly smart system is proactive and can alert you by text message or email when there are changes in the home environment. House too hot or too cold while on vacation? Water leak? Kids home from school? Security intrusion? Is alerting of interest to you?

Thank you for your input.
